

Magnum - Rechargeable LED Battery Light with PIR Sensor

New Technical Bulletin No.001

Benefits

- LED Technology for long service life
- Cost effective solution (no electrical installation required)
- Ideal for wardrobes and kitchen cabinets

Key Features

- Integrated PIR sensor
- Integrated USB charger
- Diffused cover
- Rapid battery charge time (<2 hours)

Product overview

The Magnum rechargeable battery cabinet light has a rechargeable lithium-ion battery and an integrated PIR sensor.

The battery is rechargeable using the integrated USB port and the product has an on/off switch to save the battery capacity when the unit is not in use.

The Integrated PIR sensor enables the unit to stay lit when movement is detected, or when the cabinet door is opened. If no movement is detected the unit will switch off after 10s.

The installation is simple via the self adhesive magnetic plate. The Magnum light is then attached to the magnetic plate. This can be easily removed for charging purposes.

Technical Specification

Battery Capacity	1000mAh (Lithium)-3.7V
Supply Voltage	5V
Number of LED's	24
Light Output	100 Lumens
Color Temperature	Cool white
PIR Range	120° @ 1.5m
Battery Duration	6 months - based on 2 mins of usage per day
Battery Charging	Less than 2 hours
Operating Temperature	5 to 45 Degree Celsius

Mechanical Specification

Dimensions(mm)	Weight (g)	IP Rating
Ø70 x 25 (H)	Net : 65 (g) Gross: 85 (g)	IP 20

Order Codes

Description	Order Code
Magnum Polished Chrome	SE3391N0
Magnum Stainless Steel	SE3300N0
