

### Benefits

- Provides a diffused light effect
- Ensures the LED flexible strip will not droop or sag over time
- Provides additional protection to the flexible strip

### Key Features

- Creates upwards and downwards facing light sources for maximum cabinet illumination
- Suitable for 18mm wooden shelves
- Simple push-fit installation
- Can be cut to size

### Product overview

The Adorn profile is an inconspicuous solution capable of transforming the appearance and functionality of any kitchen cabinet.

The upwards and downwards facing light sources provide practical task lighting for cupboard rummaging, as well as emitting relaxing mood lighting that will flow out of cabinets with glass windows.

For ease of installation the profile features a U-shaped channel that clips around 18mm thick wooden shelves and it can also be cut to size easily on-site.
