

Benefits

- Adds control functionality to the Titan+ Drivers
- Control all connected lights with the swipe of a hand
- Can be retrofit to the Titan+ Driver
- Doesn't impact the wattage of the driver

Key Features

- Detection range 0-5cm
- Included surface mounting bracket
- 2m connection cable
- Cut out diameter of 12mm

Product overview

The Titan+ IR Sensor is one of several accessories for the Titan+ low-profile driver. It allows for the activation of all lighting plugged into the driver with the swipe of a hand.

With simple plug and play technology, it is easy to add the Titan+ IR sensor to any new or existing Titan+ driver to increase its functionality and add a premium feel to any kitchen.

Perfect for recessed or surface mounting with the included bracket, the Titan+ IR sensor is equipped with a 2m connection cable to allow for flexible installation and seamless integration.

Technical Specification

Voltage	24V
Wattage	N/A
Detection Range	0 – 5cm
Operating Temperature	-20°C to +40°C
Operating Humidity	10% to 90%RH
Cable Length	2M

Mechanical Specification

Product	Dimensions (mm)	Weight (g)	IP Rating
SE490250	H40 x ø11.8	47	IP20
