

Benefits

- Adds control functionality to the Titan+ Drivers
- Control all connected lights via a proximity sensor
- Can be retrofit to the Titan+ Driver
- Doesn't impact the wattage of the driver

Key Features

- Detection range 0-3m
- Detection angle of 120°
- Included surface mounting bracket
- 2m connection cable
- Cut out diameter of 12mm

Product overview

The Titan+ PIR Sensor is one of several accessories for the Titan+ low-profile driver. It allows for the activation of all lighting plugged into the driver by detecting motion in proximity to the sensor.

With simple plug and play technology, it is easy to add the Titan+ PIR Sensor to any new or existing Titan+ driver to increase its functionality and add a premium feel to any kitchen.

Perfect for recessed or surface mounting with the included bracket, the Titan+ PIR sensor is equipped with a 2m connection cable to allow for flexible installation and seamless integration.

Technical Specification

Voltage	24V
Wattage	N/A
Detection Range	0 – 3m
Detection Angle	120°
Operating Temperature	-20°C to +40°C
Operating Humidity	10% to 90%RH
Cable Length	2M

Mechanical Specification

Product	Dimensions (mm) (HxWxD)	Weight (g)	IP Rating
SE491250	49 x Ø11.8	48	IP20

Order Codes
