

Benefits

- Unlocks greater functionality for Primo flexible strips.

Key Features

- Enables two lengths of primo to be attached around a corner.

Product overview

Due to its design and method of application, the Primo strip is unable to bend around corners without kinking and causing damage to the circuit board. Therefore, the corner connector is the perfect solution for linking two strips around a corner.

Technical Specification

Voltage	24V
Cable length	50mm
Material	Plastic and Rubber
Operating Temperature	-30°C to + 45°C

Mechanical Specification

Product	Dimension (mm) L x W x D	Weight (Grams)	IP Rating
SE101050	80 x 12 x 5	3.8	20
