

Benefits

- Maximize the capacity of an LED smart driver or CCT receiver

Key Features

- 4 additional ports
- Slim shape allows the port expander to be hidden away easily during installation

Product overview

The CCT port expander is the perfect accessory to increase the number of lights you can connect to your CCT Smart Driver or CCT Receiver. This is especially useful for applications that require large quantities of low wattage lights, such as plinth lighting.

Technical Specification

Wattage	120W
Voltage	12 - 24V
Cable Length	300mm
Operating Temperature	-33°C ~ + 55°C
Material	Plastic
Number of ports	4

Order Codes
