

Benefits

- Streamlined solution – reduces the need for additional components
- Plug and play connectors
- Efficient lighting control

Key Features

- 2 x Titan+ sensor ports
- Removable cable

Product overview

The Titan+ double door sensor is the ideal solution to maximise the functionality of a Titan+ LED driver for in-cabinet lighting applications.

The sensors, adapter and LED driver all connect easily with male and female connectors. Once assembled the sensors will switch the lighting on/off with the opening and closing of cabinet doors.

Technical Specification

Voltage	24V
Cable Length	2000mm
Operating Temperature	-33°C ~ + 55°C
Material	Plastic

Order Codes

Description	Order Code	Barcode
Titan+ Double Door Adapter	SE797991	5060522087298

Mechanical Specification
